EODLT	<p><b>i1Display LT - Must be ordered in multiples of 10</b>  <i>(*1 Ordering Unit = 10 SKUs)</i></p> <p>Designed for calibrating and profiling all types of monitors – LCD and CRT. i1Display LT calibrates your monitor and adjusts the color onscreen, so your images remain true with just a few simple clicks. Package includes: i1Display measurement device (emission only Colorimeter), i1Match v3.x software for monitors, ambient light head (also acts as a dust protector), i1Share software for creating, evaluating and communicating color, Interactive Training Modules and a Digital Pantone library. (no upgrade voucher)</p>	\$176.00
EODIS2	<p><b>i1Display 2 – Must be ordered in multiples of 10</b>  <i>(*1 Ordering Unit = 10 SKUs)</i></p> <p>Designed for calibrating and profiling all types of monitors – LCD and CRT. Each individual package includes an i1Display measurement device (emission only colorimeter) with ambient measurement head, i1Match v3.x software for monitors, i1Share software for creating, evaluating and communicating color, Interactive Training Modules and a Digital Pantone library and upgrade voucher (\$200 valid towards any one i1Pro solution)</p>	\$259.00
SHBU19-SEQ02	<p><b>Hubble Non-Contact Laser Guided Colorimeter</b>  <b>Must be ordered in multiples of 6</b>  <i>(*1 Ordering Unit = 6 SKUs)</i></p> <p style="text-align: right;"><i>Price effective July 1, 2008</i></p> <p>The Hubble Colorimeter is designed for measurement of today's large and micro-display technologies; technologies found in professional video and film postproduction, home entertainment, computer displays, handheld devices, theater projection, and many others. Perfect as a primary instrument for single-instrument shops, Hubble also provides a high-accuracy secondary reference through simple calibration to the primary instrument.</p>	\$3'495.00
		\$4'995.00
<b>Semi-Automated Color Management</b>		
XRCE-EZ-i1D2	<p><b>EZcolor Software with i1Display 2 Bundle</b></p> <p>The perfect entry-level color management solution for photographers and the creative community. This simple to use solution allows you to optimize and create color profiles for your scanner, monitor, and printer providing display to print matching of almost any image.</p>	\$518.00

		List Price
<b>EOBA</b>	<p><b>i1Base</b></p> <p>Entry-level color management solution. Includes i1Pro spectrophotometer and i1Match software for monitor profiling with ability to capture flash and ambient light. Package includes: i1Pro spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1Match v3.x software for monitors, i1Share software for creating, evaluating and communicating color, Interactive Training Modules, Digital Pantone Library, soft carrying case and upgrade voucher (50% discount on any one i1Match Module).</p>	\$995.00
<b>EOBAUV</b>	<p><b>i1Base UV</b></p> <p>Entry-level color management solution. Includes i1Pro UV cut spectrophotometer and i1Match software for monitor profiling with ability to capture flash and ambient light. Package includes: i1Pro UV cut spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1Match v3.x software for monitors, i1Share software for creating, evaluating and communicating color, Interactive Training Modules, Digital Pantone Library, soft carrying case and upgrade voucher (50% discount on any one i1Match Module).</p>	\$995.00
<b>EOPHT</b>	<p><b>i1Photo</b></p> <p>Designed for calibrating and profiling all types of monitors, RGB output devices in both RGB Easy and full test chart mode, CMYK output devices in CMYK Easy mode, Digital Projectors, Digital Cameras and Scanners. Allows you to measure both emissive and reflective materials, plus ambient light. Includes i1Pro spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1Reflective Scan Target, i1Match v3.x software for monitors, RGB/RGB Easy, CMYK Easy, Digital Projectors, Digital Cameras, Scanners and Profile Editor, i1Share software for creating, evaluating and communicating color, Scanner Profiling Chart, Mini ColorChecker (a color reference tool - does not work with Digital Camera module), Interactive Training Modules, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. Includes a FREE one-hour Personal Color Trainer (PCT) remote session</p>	\$1'712.00

**Part #**  
**EOPHTUVC**

**i1Photo UV Cut**

Designed for calibrating and profiling all types of monitors, RGB output devices in both RGB Easy and full test chart mode, CMYK output devices in CMYK Easy mode, Digital Projectors, Digital Cameras and Scanners. Allows you to measure both emissive and reflective materials via a permanently affixed UV Cutoff filter, plus ambient light. Includes i1Pro UV Cut spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1Reflective Scan Target, i1Match v3.x software for monitors, RGB/RGB Easy, CMYK Easy, Digital Projectors, Digital Cameras, Scanners and Profile Editor, i1Share software for creating, evaluating and communicating color, Scanner Profiling Chart, Mini ColorChecker (a color reference tool – does not work with Digital Camera module – must purchase Digital ColorChecker SG separately), Interactive Training Modules, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. (Please note: the UV Cutoff filter is permanent and not interchangeable.) Includes a FREE one-hour Personal Color Trainer (PCT) remote session.

\$1'712.00

**EOPHSGT**

**i1Photo SG**

Designed for calibrating and profiling all types of monitors, RGB output devices in both RGB Easy and full test chart mode, CMYK output devices in CMYK Easy mode, Digital Projectors, Digital Cameras and Scanners. Allows you to measure both emissive and reflective materials, plus ambient light. Includes i1Pro spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1Match v3.x software for monitors, RGB/RGB Easy, CMYK Easy, Digital Projectors, Digital Cameras, Scanners and Profile Editor, i1Share software for creating, evaluating and communicating color, Scanner Profiling Chart, Digital ColorChecker SG (required for use in Digital Camera module), Mini ColorChecker (a color reference tool), Interactive Training Modules, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. Includes a FREE one-hour Personal Color Trainer (PCT) remote session

\$1'921.00

**Part #**  
**EOPHSGTUVC**

**i1Photo SG UV Cut**

Designed for calibrating and profiling all types of monitors, RGB output devices in both RGB Easy and full test chart mode, CMYK output devices in CMYK Easy mode, Digital Projectors, Digital Cameras and Scanners. Allows you to measure both emissive and reflective materials, plus ambient light. Includes i1Pro UV Cut spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1Match v3.x software for monitors, RGB/RGB Easy, CMYK Easy, Digital Projectors, Digital Cameras, Scanners and Profile Editor, i1Share software for creating, evaluating and communicating color, Scanner Profiling Chart, Mini ColorChecker (a color reference tool – does not work with Digital Camera module must purchase Digital ColorChecker SG separately), Interactive Training Modules, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. (Please note: the UV Cutoff filter is permanent and not interchangeable.) Includes a FREE one-hour Personal Color Trainer (

\$1'921.00

**EOPRFT**

**i1Proof**

Color management system for calibrating and profiling all types of monitors CMYK printers in both full test chart mode and CMYK Easy mode, RGB printers in RGB Easy mode, Digital Projectors and Scanners. Allows you to measure both emissive and reflective materials, plus ambient light. Includes i1Pro spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1Match v3.x software for monitor, CMYK/CMYK Easy, RGB Easy, Digital Projector, Scanner and Profile Editor, i1Share software for creating, evaluating and communicating color, Scanner Profiling Chart, Interactive Training Modules, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. Includes a FREE one-hour Personal Color Trainer (PCT) remote session

\$1'712.00

**EOPRTUVC**

**i1Proof UV Cut**

Color management system for calibrating and profiling all types of monitors CMYK printers in both full test chart mode and CMYK Easy mode, RGB printers in RGB Easy mode, Digital Projectors and Scanners. Allows you to measure both emissive and reflective materials via a permanently affixed UV Cutoff filter, plus ambient light. Includes i1Pro UV Cut spectrophotometer (measurement device), ambient light measurement head, monitor holder, positioning target, scanning ruler, backup board, i1 Reflective Scan Target, i1 Match v3.x software for monitors, CMYK/CMYK Easy, RGB Easy, Digital Projector, Scanner, and Profile Editor, i1Share software for creating, evaluating and communicating color, Digital Pantone library, soft carrying case and \$400 upgrade voucher valid towards any one ProfileMaker solution. (Please note: the UV Cutoff filter is permanent and not interchangeable.) Includes a FREE one-hour Personal Color Trainer (PCT) remote session

<b>355017AC</b>	<b>PM5 Monitor Module</b> (access code)	\$207.00
<b>PM5MM</b>	<b>PM5 Monitor Module</b> (includes dongle)	\$415.00
	Monitor calibration and profile generation	
<b>355016AC</b>	<b>PM5 Scanner</b> (access code)	\$411.00
<b>PM5S</b>	<b>PM5 Scanner</b> (includes dongle)	\$619.00
	Allows creation of scanner profiles	
<b>355073AC</b>	<b>PM5 Output</b> (access code)	\$2'077.00
<b>PM5O</b>	<b>PM5 Output</b> (includes dongle)	\$2'285.00
	Completely customizable RGB, CMYK and Hexachrome / CMYK+Red+Blue / CMYK+Red+Green output profile generation. Includes MeasureTool.	
<b>355075AC</b>	<b>PM5 Measure Tool</b> (Access code)	\$619.00
<b>PM5MT</b>	<b>PM5 Measure Tool</b> (includes dongle)	\$828.00
	Test chart generation and measurement, measurement data averaging and comparison, and process control tools like optical density, gradation curves and dot gain.	
<b>355019AC</b>	<b>PM5 Editor</b> (access code)	\$828.00
<b>PM5E</b>	<b>PM5 Editor</b> (includes dongle)	\$1'036.00
	Provides ability to edit all types of profiles, including multi-color, even in device channels; ICC profile post-linearization tool; spot color reproducibility check; and 2D/3D gamut view.	
<b>PM5MC</b>	<b>PM5 MultiColor</b> (includes dongle)	\$2'077.00
	Completely customizable CMYK+X output profile generation. Separate Output module is needed if RGB, CMYK, CMYKOG, CMYKRG, CMYKRB profiling functionality is also needed. Includes Measure Tool.	
<b>355021AC</b>	<b>PM5 MultiColor Upgrade</b> (access Code)	\$723.00
	Update from PM4 MultiColor Module to PM5 MultiColor Module.	
<b>PM5ANYCM</b>	<b>PM5 aNy-Color Module</b> (includes dongle)	\$10'405.00
	N-Color with or without CMYK for up to 10 channels and GOP technology, including 3 Multicolor Plug-In licenses and 2 days on-site training.	
<b>PM5MCANYCM</b>	<b>PM5 MultiColor to aNy-Color</b> (includes dongle)	\$8'843.00
	Update from MultiColor (35.50.21) to aNy-Color (42.10.89) including 3 Multicolor Plug-In licenses and 2 days on-site training.	
<b>421160</b>	<b>Additional PM5 MultiColor Plug-in License</b> (access code)	\$515.00
	N-Color with or without CMYK for up to 10 channels and GOP technology, including 3 Multicolor Plug-In licenses.	
<b>355020AC</b>	<b>ColorPicker 5</b> (access code)	\$359.00
<b>PM5CP5</b>	<b>ColorPicker 5</b> (includes dongle)	\$567.00
	Allows creation of customer palettes. Spot color conversions into 1 device channels including chromatic adaption.	

Part #		List Price
355074AC	<b>PM5 Digital Camera</b> (access code)	\$411.00
PM5DC	<b>PM5 Digital Camera</b> (includes dongle)	\$619.00
	Allows creation of digital profiles only. ( <i>Digital Color Checker SG sold separately</i> )	
355014AC	<b>PM5 DeviceLink</b> (access code)	\$2'077.00
PM5DL	<b>PM5 DeviceLink</b> (includes dongle)	\$2'285.00
	ICC compatible device linking workflows for RGB and CMYK color spaces. Preserve & clean black channel, clean primaries.	
	<i>NOTE: Any ProfileMaker 3 to PM5 upgrade is at a 10% discount off list price of corresponding solution.</i>	
50106	<b>ProfilerMaker 5 Accessories</b> <b>Digital ColorChecker SG (semi-gloss)</b>	\$307.00
1485	<b>MonacoPROFILER Gold v4.8</b>	\$3'175.00
	Designed for reprographic shops, photo labs, photography, small print shops, service bureaus, newspapers, large print vendors, fine art reproduction studios.	
1500/530	<b>MonacoQCcolor and 530</b>	\$9'161.00
	Includes MonacoQCcolor Suite and 530 Spectrodensitometer	
1505	<b>MonacoQCcolor Solution</b>	\$18'998.00
	Includes MonacoQCcolor/530, MonacoQCcolor 5 Client Pack and 5 XRC DS.	
	<b>Part #</b>	
1481	<b>MonacoPROFILER Platinum v4.8</b>	\$4'528.00
	Designed for Service Bureaus, Commercial Printers, Fine Art Reproduction Studios, and High End Commercial Photography. Platinum includes Pantone Hexachrome and Multi-color (up to 8 color output devices) and Digital Camera Profiling.	
1500	<b>MonacoQCcolor Suite</b>	\$2'967.00
	Verify and analyze color proofs in both local and remote proofing systems. Compare colors against a standard and receive a Pass/Fail

<b>Plate Quality Control</b>		
ICP2X	<b>iCPlate2 X</b> Portable platerreader that provides a high level of plate reading accuracy with a high camera resolution, automatic calibration and energy efficiency with batteries that do not need constant recharging. It supports the full range of the most frequently used aluminum and polyester plate types. This unit reads AM, FM and hybrid screening which is the most widely used screening technology for CTP devices. Includes Capture Tool and iCPlate2 Target (see below).	\$2'701.00
ICP2XT	<b>iCPlate2 XT</b> Portable platerreader that provides a high level of plate reading accuracy with a high camera resolution, automatic calibration and energy efficiency with batteries that do not need constant recharging. iCPlate2 XT provides all of the features of the iCPlate2 X model plus the ability to measure film and paper, and more measurement values (Dot size, screen ruling, screen angle) for a more detailed analysis of the screening. Includes Capture Tool and iCPlate2 Target (see below).	\$4'055.00
ICP2XT-T	<b>iCPlate2 XT with trade-in of competitive DOT meters</b>	\$3'638.00
ICP2XT-X	<b>iCPlate2 XT with trade-in of X-RiteDot or iCPlate</b>	\$3'222.00
ICP2X-XTUP	<b>Upgrade iCPlate2 X - XT</b> Access code to upgrade iCPlate2 X unit to full functionality of iCPlate2 XT unit. Code can be applied by customer in field.	\$1'556.00
ICP2B-XUPG	<b>Upgrade iCPlate II Basic - iCPlate2 X</b>	\$619.00
ICP2B-XTUPG	<b>Upgrade iCPlate II Basic - iCPlate2 XT</b>	\$1'869.00
PQS	<b>PlateQuality 2.0 Software</b> Quality control software that stores, visualizes, and documents both individual measurements and plate characteristic curve measurements. Both measurement values and plate images are stored in a database.	\$932.00

		List Price
ICP2TGT	<b>iCPlate2 Target</b> iCPlate2 Target accuracy testing tool to supports ISO 9000 process by storing and printing the test and calibration data with the included software.	\$203.00
355417	<b>Serial Interface Cable (for iCPlate 2)</b>	\$139.00
A-CB/ICPSER	<b>Serial interface cable (for former iCPlate and iCPlate C)</b>	\$94.00
ICPTWS	<b>TabWizard Software w/Cable (for iCPlate and iCPlate C)</b> Software solution to easily import measurement values and plate images directly into an active Windows application such as Excel.	\$247.00
355107	<b>iCPlate Service Contracts</b> <b>Full Service for one year</b> Preventative Maintenance once per year, and certification after warranty period ended. Inspection, Cleaning, Function Control, Test Measurement. Shipping charges (one way) included. Repair costs (labor and spare parts) are included.	\$614.00
XRD60	<b>PlateScope</b> Advanced unsurpassed accuracy and repeatability for the latest plate and screening technologies. It supports all current screening technologies, including AM, FM, XM and hybrid screen types. Includes PlatesQuality 2.0 and Capture Tool Software.	\$5'200.00
XRD60-T	<b>PlateScope with trade in of competitive meters</b>	\$4'783.00
XRD60-X	<b>PlateScope with trade in of X-RiteDot or iCPlate</b>	\$4'367.00
XRD60-62-KIT	<b>PlateScope Calibration Plaque</b>	\$234.00
VPFLXSYS	<b>vipFLEX System</b> The vipFLEX is a complete flexo plate quality solution, including the vipFLEX desktop flexo plate reader for all types of transparent flexo plates, the PlateQuality Flexo software for analyzing and storing plate quality information and the vipFLEX target to quickly verify the accuracy of your plate reader. The vipFLEX is delivered with the following accessories: vipFLEX desktop plate reader, vipFLEX target, CD with PlateQuality Flexo software, USB software protection dongle and USB cable.	\$9'369.00
VPFLX334UPG	<b>Upgrade from former vipFLEX 334 (with FlexoEye software)</b> The upgrade is delivered with the following accessories: vipFLEX target, CD with PlateQuality Flexo software, USB software protection dongle.	\$1'374.00
VPFLXTI	<b>Trade-In former vipFLEX 330 and 333 systems</b> The vipFLEX is delivered with the following accessories: vipFLEX desktop plate reader, vipFLEX target, CD with PlateQuality Flexo software, USB software protection dongle and USB cable. Return only PC-Card and data cable from original vipFLEX. Benefits of new system compared to old system: color camera, better and adjustable algorithms in software, vipFLEX Target, PlateQuality Flexo software.	\$7'870.00

<b>Pressroom Color Measurement Handhelds</b>		
<b>QUIKDens Densitometer</b>		
Quick and fully automated CMYK densitometer for basic pressroom needs. The QUIKDens 100 includes the functionality: Density and Grey Balance. The QUIKDens is optionally available with small aperture and polarization filter.		
QD100TUL	QUIKDens 100 Status T / Unpolarized / large aperture	\$1'560.00
QD100TUS	QUIKDens 100 Status T / Unpolarized / small aperture	\$1'560.00
QD100TPL	QUIKDens 100 Status T / Polarized / large aperture	\$1'560.00
QD100TPS	QUIKDens 100 Status T / Polarized / small aperture	\$1'560.00
QD100EPL	QUIKDens 100 Status E / Polarized / large aperture	\$1'560.00
QD100EPS	QUIKDens 100 Status E / Polarized / small aperture	\$1'560.00
A-CAL/TP	Calibration Card - Status T, Polarized	\$208.00
A-CAL/TU	Calibration Card - Status T, Unpolarized	\$208.00
369647	Calibration Card - Status E, Polarized	\$208.00
421341	QUIKDens Serial Interface Cable	\$130.00
<b>DensiEye700 Densitometer</b>		
A fully automated 4-channel densitometer for CMYK measurement. It measures up to density 3 and includes the full set of functionality to measure density, dot gain, dot area, trapping, gray balance and print characteristics. The optional small aperture and polarization filter makes this unit ideal for the newspaper and magazine printing markets. <i>The DensiEye 700 is available with Status T, I, or E.</i>		
DE700TPL	DensiEye 700 Status T / Polarized / large aperture	\$2'393.00
DE700TPS	DensiEye 700 Status T / Polarized / small aperture	\$2'393.00
DE700TUL	DensiEye 700 Status T / Unpolarized / large aperture	\$2'393.00
DE700TUS	DensiEye 700 Status T / Unpolarized / small aperture	\$2'393.00
DE700IPL	DensiEye 700 Status I / Polarized / large aperture	\$2'393.00
355337	DensiEye 700 Status I / Polarized / small aperture	\$2'393.00
DE700IUL	DensiEye 700 Status I / Unpolarized / large aperture	\$2'393.00
355339	DensiEye 700 Status I / Unpolarized / small aperture	\$2'393.00
DE700EPL	DensiEye 700 Status E / Polarized / large aperture	\$2'393.00
355341	DensiEye 700 Status E / Polarized / small aperture	\$2'393.00
DE700EUL	DensiEye 700 Status E / Unpolarized / large aperture	\$2'393.00
355343	DensiEye 700 Status E / Unpolarized / small aperture	\$2'393.00

	<b>500 and 939 Series Portable Hand-held Spectrodensitometers</b>	
504	<b>Portable Color Reflection Spectrodensitometer</b>	\$1'967.00
	Our entry-level model 504 measure any density status quickly and reliably. Features high-impact materials for reliability and an industry-leading 3-year warranty.	
508	<b>Portable Color Reflection Spectrodensitometer</b>	\$2'592.00
	Our basic 508 densitometer is great for prepress and the press room – it accurately measures density, dot area and dot gain in a single instrument. Includes industry-leading 3-year warranty.	
518	<b>Portable Color Reflection Spectrodensitometer</b>	\$3'113.00
	Our standard pressroom densitometer is essential for 4-color press operators. Use it to help determine which press adjustments need to be made during the run. Includes 3-year warranty.	
528	<b>Portable Color Reflection Spectrodensitometer</b>	\$4'674.00
	For printers who print special colors and process color, the 528 is the basic model of choice. Includes ColorMail Express, Pantone Digital Color Libraries and a 3-year warranty.	
530	<b>Portable Color Reflection Spectrodensitometer</b>	\$7'235.00
	Offers full spectral data, colorimetry or densitometry. This hand-held measures color targets as narrow as 1.6mm while most spectrophotometers measure a 4.0mm spot size. Includes 3-year warranty.	
	<b>Option P - Microspot Option for all 1.6mm x 3.2mm aperture</b>	\$208.00
	<b>Option S – Small Spot Option</b>	
	<b>Option L – Large Spot Option</b>	
	<b>Option /LP – Polarization filter. Not available on microspot or small spot</b>	
939	<b>Portable Color Reflection Spectrodensitometer</b>	\$10'306.00
	The 939 hand-held spectrodensitometer is the ultimate 0°/45° and has the best accuracy and inter- instrument agreement. Interfaces with

**InkFormulation Online (including ColorQuality Online)**

A web-client solution (based on IFS Manufacturer) for ink manufacturers and suppliers that allows their customers to access a centralized, easily updatable database of ink formulation data via the Internet. Printers that do not wish to install local ink formulation software can easily access high quality ink formulation databases, developed by experts that they can rely on for mixing and matching inks.

**NEW! Installation, training and one year support contract is included in the server price**

## ColorChecker Charts

Part #		List Price
<b>MSCCC</b>	<b>ColorChecker Chart</b> A 4 x 6 array of 2" colored squares used for calibrating and evaluating color reproduction systems. The ColorChecker is 8.5"x11.5" proportioned to fill a 35mm frame. Packaged in a protective sleeve with instructions describing suggested applications and technical information.	\$77.00
<b>M50111</b>	<b>Mini ColorChecker Chart</b> 3 ¼" x 2 ¼" array of colored squares used for calibrating and evaluating color reproduction systems.	\$61.50
<b>M50101</b>	<b>ColorChecker Custom White Balance Card</b> The ColorChecker Custom White Balance Card is an 8.5"x11.5", spectrally neutral 18% gray card engineered to provide good camera balancing under any light conditions. The card is used to fill the camera frame and provide a reference for the camera. Packaged in a protective sleeve with instructions describing suggested applications and technical information.	\$51.00
<b>421869</b>	<b>ColorChecker Mini Gray Balance Card</b> ColorChecker Mini Gray Balance card is a pocket size version of the 18% Gray reference square used in the standard 24-patch ColorChecker. This Gray is scientifically engineered to provide a precise uniform surface that is spectrally neutral (reflects equal amounts of red, blue and green) in all types of light conditions. The photographer can now have confidence that the camera's raw image is as close to real life as possible.	\$41.00
<b>421870</b>	<b>ColorChecker Mini White Balance Card</b> ColorChecker Mini White Balance card is a pocket size version of the white reference square used in the standard 24-patch ColorChecker. This white is scientifically engineered to provide a precise uniform surface that is spectrally neutral (reflects equal amounts of red, blue and green) in all types of light conditions. The photographer can now have confidence that the camera's raw image is as close to real life as possible.	\$41.00
<b>M50103</b>	<b>ColorChecker Custom Grayscale Card</b> The ColorChecker Custom Grayscale Card is an 8.5"x11.5", spectrally neutral three step gray scale card engineered to provide quick studio lighting balancing. The card is used to quickly determine the maximum lighting ratio for the fill and main lights in the studio. Packaged in a protective sleeve with instructions describing suggested applications and technical information.	\$61.50
<b>421868</b>	<b>ColorChecker Mini Grayscale</b> ColorChecker Mini Grayscale card is a pocket size version of the white, 18% gray and black reference square used in the standard 24-patch ColorChecker. This target is scientifically engineered to provide a precise uniform surface that is spectrally neutral (reflects equal amounts of red, blue and green) in all types of light conditions.	\$41.00

Part #		List Price
	<b>Digital ColorChecker SG (semi-gloss)</b>	
<b>MSDCCSG</b>	<b>For use with ProfileMaker 5 Digital Camera Module</b> Chart contains 140 color patches chosen for optimal results. Includes standard 24 ColorChecker chart colors. More skin-tone reference colors deliver greater accuracy and consistency over a wide variety of skin tones. Grayscale steps provide accurate control of camera balance and maintain a neutral aspect regardless of light source. Sturdy, standardized target size of 8.5 x 11 inches (21.6 x 27.9 cm) easily fits into a full frame shot.	\$295.00
<b>Part #</b>		
<b><u>Color Vision Test</u></b>		
<b>80000</b>	<b>FarnsworthMunsell 100 Hue Test</b> 100 Hue Test for screening color vision accuracy. Contains carry case with four trays containing a total of 85 numbered disks with varying hues.	\$725.00
<b>20103</b>	<b>FarnsworthMunsell Dichotomous D15 Test</b> A modification of the 100 Hue Test intended for screening color vision defects only. Contains a reference cap and 15 numbered disks with all different hues.	\$197.00
<b><u>Lighting</u></b>		
<b>JUS50U30A</b>	<b>Judge II-S Viewing Booth (D50/U30), 100V-117V/50-60HZ</b>	<b>\$1'416.00</b>
<b>JUS5084A</b>	<b>Judge II-S Viewing Booth (D50/L 84), 100V-117V/50-60HZ</b> Provides multiple light sources for general color matching, and evaluation of color quality and uniformity. The Judge II-S is equipped with five (5) selectable light sources for a full range of color evaluations. Simulated Daylight (D50), Cool White Fluorescent (CWF) at 4150K, Illuminant "A" (Incandescent) at 2856K, Custom Fluorescent (TL84 or Ultralume 30), and Ultraviolet (UV). The Daylight source utilizes the Macbeth unique seven (7) phosphor fluorescent daylight technology.	<b>\$1'416.00</b>
<b>PL50444A</b>	<b>Prooflite Luminaire PLD50-440, 117V/60Hz – D50 – 4 lamps</b>	<b>\$541.00</b>
<b>PL50848A</b>	<b>Prooflite Luminaire PLD50-840, 117V/60Hz – D50 – 8 lamps</b> Prooflite PLD is an overhead luminaire that provides fluorescent simulated daylight. It is used for visual color evaluations, when evaluations under a fluorescent daylight source are acceptable. The Daylight source utilizes the Macbeth unique seven (7) phosphor fluorescent daylight technology. D50 Noon Sky Daylight at 5000K is used for the evaluation of color quality and uniformity in conformance with ANSI and ISO specifications governing the graphic arts. Note: Lamps are included with the fixture. Final installation of fixture requires a Certified Electrician and must be supplied by end-user.	<b>\$670.00</b>
<b>A-LK/5048</b>	<b>Examolite SD-840D (5000K) 482 Lamp Kit</b> This kit consists of eight (8) F40T12/50 Macbeth seven (7) phosphor fluorescent daylight lamps.	<b>\$101.00</b>

**Part #**

**SPECTRALIGHT® III  
Viewing Booths & Overhead Luminaires**

SpectraLight® III is a visual evaluation system which provides multiple light sources for critical color matching. The SpectraLight III can be purchased as a viewing booth, an overhead luminaire, or as a dual or multiple overhead luminaires. The viewing booth is typically used for evaluation of small hand-held samples such as color chips. The overhead luminaires (single, dual or multiples) are designed to be chain hung over a work surface and are typically used for evaluation of larger products such as automotive body parts. The choice of installations should be based on the average product size and viewing area requirements.

SpectraLight III is equipped with six (6) selectable light sources for a full range of color evaluations: Simulated Daylight (D75, D65, or D50), Horizon Daylight at 2300K, Illuminant "A" (Incandescent) at 2856K, Cool White Fluorescent (CWF), and a choice of TL84, or Ultralume 30, and two levels of Ultraviolet. The choice of a specific daylight source and custom fluorescent should be made based on the standard governing your industry or application:

**Simulated Daylight** - As outlined in ASTM 1729, there are three kinds of simulated daylight.

D75 (Overcast North Sky Daylight) at 7500K and D65 (Average Daylight) at 6500K are both used for visual evaluation of opaque materials. D65 is the most popular, as it provides better visual correlation with spectrophotometric readings and is now specified in many international and national standards. D50 (Noon Sky Daylight) at 5000K is used for the evaluation of color quality and uniformity in conformance with ANSI and ISO specifications governing the graphic arts. SpectraLight III Simulated Daylight is a uniquely filtered UV enhanced smooth spectrum daylight that scores an industry leading A/C rating on the CIE daylight simulator scale. (See CIE publication 51)

Custom Fluorescent - Cool White Fluorescent (CWF) at 4150K is a common wide band fluorescent which simulates U.S. office or store lighting, TL84 at 4100K is a commercial narrow band fluorescent used in Europe and Asia, and Ultralume 30 (U30) at 3000K is a commercial narrow band fluorescent used in the U.S.

**Note:** Meets ASTM, ISO, and DIN standards. Daylight filters and a full complement of lamps are included with all units. Assembly required for the viewing booth version (VB). The overhead luminaire version (OVHD) is a single overhead luminaire. The dual version (DUAL LUM) includes two (2) units that are wired / operated together and a tethered remote control is provided.

<b><u>Training and Seminars</u></b>		
<b>TREOWS</b>	<b>Classroom Training</b> <b>i1 Color Workshop</b>  This intensive one-day workshop covers color management for those using or considering the i1Pro system. From calibration to workflow, attendees learn hands-on about the creation and use of profiles to get outstanding color using i1Match and i1Share. Classes are held in X-Rite training centers. This training workshop is included in i1XT packages.	\$619.00
<b>TRICMPM</b>	<b>Integrated Color Management with ProfileMaker</b>  This comprehensive 4-day program is the best way for graphics industry professionals to learn all of the components of color management using ProfileMaker. From calibration to workflow, attendees will fully understand the creation and integration of profiles for cameras, scanners, monitors and printers to get outstanding color throughout their workflow. Attendees create their own color-managed workflow at their own fully equipped workstation and will be able to get matching colors from original to final print at the conclusion of the course. We also discuss how to communicate color management with your customers and eliminate color workflow bottlenecks. Whether you have a desktop inkjet or are going out to press, this class will help you get the color you expect every time. Classes are held in Cleveland, Ohio and San Diego, California.	\$1'973.00
<b>TRICM</b>	<b>Introduction to Color Management</b>  This introductory course will teach you the basics of color management theory, strategy and technology. You'll learn about color spaces, L*a*b, spectrophotometry and other mysteries—all presented in an easy to understand manner. At the end of this course you'll be ready to start making profiles and using color management to get the best possible results. Classes are held in Cleveland, Ohio and San Diego, California.	\$932.00
<b>TRCUSTOS</b>	<b>On-Site Training</b> <b>Customized Training and On-Site Consulting</b>  On-site training is customized around your equipment, software, workflow and particular goals. Speak with a training coordinator at 888.439.4403 to determine the appropriate amount of days to address the needs. Rate is charged per day for a minimum of 2 days plus travel expenses. Single day or weekend training is available at \$1,800 plus travel expenses.	\$1'822.00
