

Flexible solution for industry
standard compliant contract proofs

ProofMaster®

Accurate communication of what final prints will look like is key to customer confidence in any print business. Unexpected results are costly, time-consuming and damage that confidence.

Contractual quality for better communication between print-buyer and production

With ProofMaster's modular Calibrator, Editor and RIP tools, you have a solution that can deliver those results every time whatever your output. ProofMaster will ensure color-accurate contract proofs in line with the ISO 12647 or other industry standards.

Built for flexibility and growth

ProofMaster consists of different modules: add functionality such as 1-Bit proofing or profile creation through the different available options. You can also add printer drivers to increase your production capacity.

Efficiency through automation

If you need advanced automation and interaction with other applications, ProofMaster seamlessly integrates with Enfocus Switch.

Proofmaster Benefits

Enable better communication between print-buyer and production

- Enables ISO 12647 and other industry standard certified proofing.
- Enfocus Certified PDF and Unique Identifiers supported.
- Integrates with Enfocus Certified PDF® technology to ensure you don't print files with errors.

Achieve better quality

- Intuitive user interface allows for easy calibration, profiling and fine-tuning.
- For specialty applications such as packaging the Multi Channel color engine allows for spot-on color output.
- Substrate simulation capabilities allow you to mimic paper textures or varying ink absorptions.

Produce more... efficiently

- Produce more jobs per day through accurate proofing. Simply plug in additional print drivers to increase the type and amount of machines you can drive.
- ProofMaster easily automates repetitive tasks and seamlessly links into production automation systems such as Enfocus Switch.

Proofmaster Key Features

ProofMaster RIP

- The standard product drives up to two printers but this can be easily expanded.
- Easily set up an unlimited number of proofing or printing queues driven by hot folders to enable workflow automation.

ProofMaster Editor

- Dedicated Editor offers last minute correction and soft proofing features.
- Easily find your way around the application through Adobe® Illustrator®-type functionality and a similar look and feel.

ProofMaster Calibrator

- Works optimally with Xrite i1.
- Achieves color accuracy through standard and customized ICC profiles.
- State-of-the-art color engine handles Multi Channel input and output profiles.
- Provides access to basic substrate texture simulation for an even closer match with the final product.

Options

1-Bit

The ProofMaster 1-Bit option allows to take in rasterized files, working in a RIP Once Output Many workflow.

Advanced Color

The Advanced Color Option enables you to create in-house Multi Channel printer profiles and DeviceLink profile creation and tuning give full control over spot color simulation.

RasterCreator

Turn your digital printer into an affordable image-setter with the PrintFactory RasterCreator option, ideally suited to producing films for silkscreen printing.

System requirements

Mac OS® 10.4.11 - 10.5.x

Processor: 2.0GHz Intel® Core™ 2 Duo 4MB on-chip L2 cache.
Memory: 4Gb
Hard Disk: SATA 160Gb (5400 RPM)
Optical drive: SATA 16x DVD-ROM
Network interface: Integrated Gigabit LAN
I/O port: USB 2.0

Windows® XP Professional SP2 or Vista

Processor: Dual-core AMD Opteron™ 2GHz
1Mb L2 cache
Memory: 4Gb
Hard Disk: SATA 160Gb (7200 RPM)
Optical drive: SATA 16x DVD-ROM
Network interface: Integrated Gigabit LAN
I/O port: USB 2.0
